## PROJECTS

### • Online Library Management System

Library Management System is a web app built with PHP and MySQL to simplify library tasks. Admins manage books and users, while students track issued books, due dates, and fines.

<https://github.com/07Nishmitha/Online-Library-Management-System.git>

### • Saraswathroadlines

This web development project uses HTML, CSS, and JavaScript to showcase a company and its supplies.

[Liveliink:https://saraswathroadlines.com/](https://saraswathroadlines.com/)

### • Bus Pass Management System

An android app that allows user to apply for a bus pass, make online payments and access a pass.

### • Granny's Table

An Android app for village food recipes using Java and Firebase, featuring categorized browsing, real-time search, and user authentication.
